

Tips total to the end of October 2017: ~\$1155.66

During November 2017, DSP enabled Nightbot to show tips.

During December 1st 2017 Nightbot stopped displaying tips, it showed the only visible one I could find on the Horizon Zero Dawn videos and it showed a \$1 tip during the NfS Payback prestream that DSP gave a shoutout for... then nothing.

I only spotted this while checking the prestream for talk about the Live Pet, there was a clear \$2 tip which Nightbot did not mention, and more to come.

As such I will continue doing image scanning, but will incorporate those into this text document with guesstimated times as possible.

Also this means I can include the messages. When a 'swearword' like fuck is used, it's censored like @%#! and if I can guess which 'swearword' was used I will just replace it.

Since for December I decided to document tips in a text document to continue to produce the Twitch Income file, I decided to backtrack to September & October's similar image scanned tips and produce text documents for them as well.
